Hi Chuck:

Attached is Dr. Snow's Interpretative Report for the NE Juneau Groundwater Investigative Sampling done April 30 through May 3, 2018.

Sincerely,

Cheryl Burdett

Subject: FW: UNL Isotope Interpretive Report

Hi Cheryl,

Dr. Snow sent us the isotope analytical results interpretive report on Friday (9/14). The report was delayed because UNL's contract manager requested changes be made to the subcontract and Dr. Snow was waiting on the final subcontract to be issued.

Please note that Dr. Snow indicated he will be out on travel next week, so may not be able to answer technical questions until he returns.

Please let me know if you have any questions!

Thank you,
Daisy Wang

Daisy,

I now have to make a trip out of town next week, so I rearranged my schedule and finished the report today. Please let me know if you have any questions or need additional information. I tried to keep it short and mainly addressed the information requested in the contract. I hope this will meet your needs.

Thanks! -Dan

Hi Daniel,

Can you please respond to confirm that you can provide the report by next Thursday (9/20)?

Thank you,
Daisy Wang

Hi Daniel,

OK, I understand – the subcontracting process is never as straightforward as we would like! EPA was hoping to receive your report by the end of last week, so we kindly ask that you provide the report as soon as possible.

Please note that the fully executed subcontract was issued on September 6, and our statement of work specifies that the report is due 14 days after the subcontract is issued. Therefore, we ask that the report be provided by **Thursday, September 20**, at the latest.

Please let me know if you have any questions.

Daisy,

I am working on the interpretative report, but it will likely not be completed until later this month. The contract and agreement was not approved internally until yesterday. Ideally, I will be able to provide this by net Friday, September 21. -Dan

Hi Daniel,

Can you please provide an update on the isotope analysis results interpretive report? I thought we had previously discussed getting the reports by 9/7, which was last Friday. When can we expect to receive it?

Thank you,
Daisy Wang

Daisy,

Sorry but I was referring to an earlier version of the statement of work and did not see that the quality assurance report had been included in the final agreement. I will try to have the QAQC report completed by August 24th. Will provide an estimated completion date for the interpretive report after the contract has been finalized.

Thanks! -Dan

Hi Dr. Snow,

I just checked in with EPA – would it be possible for you to respond to the RFP by mid-next week (8/15) and then (assuming there are no problems with the response) to provide the report by 8/31?

In addition, can you please provide the Additional Quality Control Report on an earlier timeframe, since it is a deliverable already covered under the current purchase order? EPA would like to have this data as soon as possible.

Please let us know, thank you!

Daisy,

I would expect that the contract can be reviewed and returned by August 17th, but I'll have to let Sheryl handle this when she returns.

Assuming there are no problem with the new contract, I can provide the additional reports by September 7th. -Dan

Hi Daniel,

Thank you for your fast response. We can extend the RFP due date; when is the earliest that you can respond by? Can you please also give me an idea of how much time after the paperwork is in place you would need to complete the report?

I believe EPA would like to complete this work as soon as possible, but I am not aware of any other specific timing restraints.

Thank you,
Daisy Wang

Good morning Dr. Snow,

We received an out-of-office response from Sheryl May – should we forward the RFP to one of the POCs listed below? Or will Sheryl be able to respond when she returns? Please note that we're requesting a response by this Friday, August 10.

Thank you,

Daisy Wang
